

The Geo-Institute Geotechnics of Soil Erosion Technical Committee will live-stream the session “Demystifying scour and erosion for the non-specialist practitioner” on Friday, December 12, at 11 AM EST. The talks include:

Talk #1: “Mechanisms and mechanics of scour as a singular phenomenon”, (presented by Bret Lingwall, Ph.D., P.E., BC.GE., F.ASCE)

Abstract coming soon

Talk #2: “Scour and external erosion, new perspectives on influence of material weathering and aging” (presented by Calvin Tohm, Ph.D., M.ASCE)

Abstract coming soon

Talk #3: “Scour and internal erosion of dams, the path from flaw to failure” (presented by Dennis Hanneman, P.E.)

Abstract coming soon

Talk #4: New findings on Backwards Erosion Piping of dams (presented by Bryant Robbins, P.E., M.ASCE)

Abstract coming soon
